

ABOUT ADRF

Advanced RF Technologies, Inc. ("ADRF") is an established, leading provider of in-building equipment and services that improve wireless coverage and capacity for the largest service providers and enterprise customers around the world.

ADRF's product suite encompasses active systems, including RF and optical repeaters, digital distributed antenna systems, and passive components and antennas.

ADRF offers complete, custom-designed turnkey solutions for wireless carriers, enterprise and public safety entities. We leverage our substantial wireless industry experience and in-building expertise to give our customers a seamless experience.

THE SIGNAL FOR SUCCESS

**SUCCESS
IN TODAY'S
WORLD
BEGINS
AND ENDS
WITH THE
ABILITY TO
CONNECT.**

**THE DEMAND FOR AND THE
COMPLEXITY OF WIRELESS
SYSTEMS GROW DAILY.**

Sophisticated, available, robust and flexible wireless infrastructure is an absolute necessity in our communications-rich world.

ADRF is one of the most successful and widely recognized providers of wireless communications systems in the world. We have an established track record for providing highly sophisticated yet extremely reliable systems, including RF and optical repeaters as well as digitally distributed antenna systems. Our experience enables us to develop the world's most versatile and flexible suite of products.

At ADRF, we are proud to leverage our extensive knowledge and experience to make wireless coverage and capacity systems smarter, enabling our clients to seamlessly integrate a full end-to-end wireless solution that meets today's demands and provides a clear pathway to the future.

*MARKET DRIVERS CONTINUE TO
PUSH THE LIMITS OF NETWORKS,
WITH NO END IN SIGHT.*

THE SIGNAL FOR SUCCESS

THE NUMBER OF SMARTPHONE USERS IN THE U.S. CONTINUES TO GROW YEAR OVER YEAR*

SMARTPHONE GROWTH (in millions)

* Individuals of any age who use a smartphone at least once per month. Source: eMarketer, Dec 2010

“Our systems are designed to be seamlessly integrated into a single, cohesive solution. ADRF is simply a smarter and more efficient approach to wireless networks.”

Mike Jones
Sales Engineering Manager
West Region
Advanced RF Technologies

ADRF OFFERS A UNIQUE AND HOLISTIC APPROACH BY DESIGNING AND PRODUCING EACH KEY COMPONENT OF THE SOLUTION.

It's simple – ADRF takes full system responsibility by providing all of the key components of a total wireless solution. We offer a wide variety of active and passive components, including repeaters, distributed antenna systems, antennas and other critical system components. These offerings make the system easier and less expensive to design, install and maintain, eliminating the time, hassle and complication associated with sourcing and integrating disparate components from various vendors.

ADRF products cover a wide range of frequencies and technologies to offer a flexible and scalable solution to meet all your wireless needs, making us your one-stop shop for all your wireless requirements.

ADRF's ADX Series Active Fiber Distributed Antenna System (DAS) is a logical evolution of our core product suite of industry-leading coverage and capacity solutions to enhance in-building voice and data services for major carriers as well as neutral host systems.

THE SIGNAL FOR SUCCESS

PLANNING

We utilize the latest and most sophisticated data collection and processing tools to provide a complete survey of the RF environment.

DESIGN

We then create detailed designs for in-building wireless networks to ensure coverage for all the services in the design.

PRODUCTS & SYSTEMS

We leverage our comprehensive suite of sophisticated yet reliable products to create a seamless system.

IMPLEMENTATION

We take full responsibility for the installation and commissioning of all equipment and materials to ensure proper operation and coverage.

SERVICE & SUPPORT

We monitor the performance of the system and provide technical support 24 hours a day, 7 days a week.

A SEAMLESSLY INTEGRATED WIRELESS SOLUTION IS ABOUT MORE THAN JUST THE HARDWARE. IT'S ABOUT TRULY UNDERSTANDING THE REQUIREMENTS OF THE SITE, THE END USERS, AND HAVING THE SPECIFIC EXPERTISE TO SUPPORT YOU EACH STEP OF THE WAY.

At ADRF we pride ourselves on our ability to align our services to fit your unique challenge. Let's face it—wireless initiatives can represent complex agendas, evolving technologies and unforgiving time frames. Which is exactly why our service-centric focus consistently produces successful outcomes for our customers. Like designing your system so that the coverage is complete and specifically contoured to your site and to the services you plan on providing.

We also understand that accurately determining the products and materials required for the specific site along with providing a knowledgeable, experienced project manager are vital to a cost-effective and timely installation. We also know that factory-trained and certified technicians commissioning the wireless system is the only way to ensure a problem-free, timely start-up. We believe that all of these are vital elements of a total, seamless wireless solution.
